

# MODULUS CHECKWEIGHER LABELLER

Product Video

## Features

- Product Weighing and Labeling Sec/1
- +/- 1 gr. Weighing Precision
- Stainless Design
- Siemens PLC Automation Products
- Resistant Material to Pressure Water
- Remote Access
- Customer Customized Software
- Multilanguage Support

*It is a special system that fulfills a need of industrial labelling and high dynamic precision scale at the food sector. It scales the products fast and it labels them according to their qualification after it sends instant information to the labelling system.*

*By watching your product real-time by its software, you can increase your operational performance. Besides, by making the weight division for products and packs, it presents you reports about the accepted or refused products due to various reasons.*
